

WEATHER BULLETIN.

SIGNAL OFFICE, WICHITA, KAN., August 18.—The highest temperature was 82°, the lowest was 62°, and the mean 72°, with slightly warmer, partly cloudy weather and falling barometer with fresh southerly winds.

Last year on August 18, the highest temperature was 85°, the lowest 68°, and the mean 76°, and two years ago the corresponding temperatures were 83°, 68° and 76°, with .06 inch of rain.

FRED L. JOHNSON, Observer.

WAR DEPARTMENT, WASHINGTON, D. C., August 18, 8 p. m.—Forecast until 8 p. m. Tuesday.

For Kansas—Local showers, cooler except in southeastern portion, stationary temperature, winds shifting to northerly.

For Missouri—Local showers, succeeded by fair in eastern portion, southeasterly winds becoming variable; slight change in temperature.

ENCOURAGEMENT FOR THE FEEBLE.

So long as the failing embers of vitality are capable of being kindled into a warm and genial glow, just so long there is hope for the weak and enervated invalid. Let him not, therefore, despair, and let him encourage himself with the thought that the further fact that there is a restorative most potent in renewing the dilapidated powers of a broken down system. Yes, thanks to its unexampled tonic virtues, the Hostetter's Stomach Bitters is daily reviving strength in the bodies and hope in the minds of the feeble and nervous. Appetite, refreshing sleep, the acquisition of flesh and blood, are blessings attendant upon the reparative processes which this priceless invigorant speedily initiates and carries to a successful conclusion. Digestion is restored, the blood fertilized and sustenance afforded to each life-sustaining organ by the Bitters, which is indispensable even to the feeblest palate, vegetable in composition and thoroughly safe. Use it, and regain vigor.

CROSSING MADE WITHOUT TROUBLE.

KANSAS CITY, Mo., August 18.—Judge Phillips, of the district court, today refused to interfere in the matter of the belt line railway crossing the Missouri Pacific and Alton tracks, on the ground that the federal court had no jurisdiction. As soon as the decision was rendered the belt line sent a large force of men to construct the crossing. They were met by Superintendent Dolley, of the Missouri Pacific, and an official of the Alton, in command of a force of men employed to prevent the construction of the crossing. Marshal Motown, in command of deputies, was on hand to prevent any violence, and the crossing was made without trouble.

Ayer's Sarsaparilla will remove that tired feeling, and give new life and energy.

ON THE TRACK.

CHICAGO, Ill., August 18.—Opening day Northwestern broodstock association. Strawn won the 2:20 trot; Keller, second. Best time, 2:25.

The 2:34 trot was won by Harry Medium; Prince Edward, second. Best time, 2:35.

Fast, in an attempt to beat the three-year-old record, was postponed.

The match trotting race between Elletwood and Scotchman was won by the latter. Best time, 2:45.

SARATOGA, N. Y., August 18.—The winners of today's races were: National, Golden Reel, Vainilla, Frolongate, Cabot, Frank Ward.

Every mother should keep Ayer's Cherry Pectoral in case of croup and sudden colds.

DIED FROM HIS INJURIES.

KANSAS CITY, Mo., August 18.—George Mills, a well known St. Louis newspaper man, died today from the effects of injuries received last Saturday night in a fall from an upper balcony of Music hall at Excelsior springs. He had been watching the electric street Saturday night from the outside balcony and when he attempted to re-enter the window slipped and fell over the railing. The funeral arrangements have been postponed until his son, George R. Mills, of Toledo, who is traveling in the north, can be communicated with.

The people's medicine—Hood's Sarsaparilla. Its success is due to its peculiar medicinal merit.

FIRE AT AUGUSTA.

EL DORADO, Kan., August 18.—Fire broke out this morning at 4:30 o'clock at Augusta, a small town near here in the Moyle building and destroyed the building together with the Richardson drug store building and stock, the Vets Clothing company building and stock and the Hams hardware establishment. Loss \$30,000, insurance \$10,000.

Beecham's Pills cure bilious and nervous ills.

KILLED IN THE STORM.

OLAH, Kan., August 18.—Last Saturday evening during a heavy storm the house of Joseph Hunt, near Stanley, was struck by lightning, tearing one end of the house to pieces and instantly killing Withered Hodges, Mr. Hodges' parents live near Sedalia, Mo.

Do not take any chances of being poisoned or hurt to death with liquid stove polish, paraffin or kerosene in stoves. The Rising Star stove polish is safe, odorless, brilliant, the cheapest and best stove polish made, and the consumer pays for no expensive tin or glass package with every purchase.

PEARS SOAP is a most elegant toilet adjunct.

LUMPY JAWED CATTLE.

KANSAS CITY, August 18.—State Line Stock Inspector Canaway made an inspection of the Kansas City, Kan., stock yards today. Six cattle were found to be lumpy jawed. They were killed and their organs removed for examination to ascertain whether the disease is infectious.

Pimples, blackheads, red, rough and oily skin prevented by CUTICURA SOAP.

IN FAVOR OF GUTHRIE.

ATCHISON, Kan., August 18.—The result of the Leavenworth Republican primaries indicates the nomination of W. W. Guthrie, of this city, for congress. Leavenworth holds the key to the situation and a plan was put up to carry the primaries for Guthrie. Guthrie will not accept a nomination, but his name was kept in the delegation so as to keep Guthrie from getting it. Leavenworth city will have half the delegates in the county convention, and if Guthrie gets any of the county delegates at all he can contest the convention. The congressional convention meets at Holton September 13.

SNOW AT DENVER.

DENVER, Col., August 18.—A very light snow, the first of the season, fell here tonight.

A SLEEPLESS NIGHT IN VENICE.

When hope lies dead—ah, when 'tis death to live, And struggle remembered make the heart still bleed.

Better are sleep's kind lies for life's blind need Than truth, if 'tis a little peace can give.

A little peace! 'tis all I crave, 'tis all I need, O sleep! to lead it: thine to quell or feed.

This love that starves—this starving soul's long groan—

And bid, O sleep, the queen of hell, forgive, You moon that mock us through the uncurtained glass.

Recall that other night, that other moon— Two English looms on a gray lagoon—

The voices from the lullaby's gondolax, The kiss, the breath, the flashing eyes, and soon

The throbbing stillness; all the heaven that was, And the moon that mock us through the uncurtained glass.

Salt Is Good.

"Salt is good." It is the language of inspiration, as well as of therapeutics. In all the range of the household materia medica there is no remedy half so valuable as common salt, both because of its real curative properties and of its immediate availability. And moreover, it has this advantage over more pretentious remedies, that seldom in case of over zeal or mismanagement can it be made to do mischief. If it doesn't heal it won't kill, at any rate. Here are some of the things it is good for:

Heated dry and applied to the outer surface over the seat of inflammation or congestion, it will give almost instant relief, while applications of a strong, hot solution of salt, in water or vinegar, act like magic upon toothache, earache, neuralgia headache and all that brood of distressing ills.

For catarrhal affections and sore throat a spray of warm water and salt is almost a specific, and is one of the standard prescriptions of the "nose and throat" specialists. For hay fever and those other slighter forms of nasal sensitiveness that induce a constant sneezing there is no remedy more quickly palliative and often curative than the vapor of heated salt in alcohol.

Put both in a tin vessel and heat over a flame. When there is a good showing of vapor place the vessel underneath a covering that envelops the head as well and inhale the vapor through both nose and throat. For influenza and ordinary colds this treatment is also excellent.—New York Evening Sun.

Saved by a Bullfrog.

There are at least four newspaper reporters in New York who are staunch friends of the bullfrog family. They are engaged on morning papers, and they were plowing their way at a tremendous pace through the sand and wire grass of the meadows skirting Newark bay back of Greenville, N. J., to investigate a story of a yacht that had been missing.

The four men on board, for several days, had been looking for the yacht, and the story promised to be a long one and much valuable time had been wasted in discovering the name of the place from which the boat had sailed, so the young men were pushing on in the dark toward the shore without stopping to search for footpaths. All at once, from just beneath their feet, a voice that was almost human croaked "Blookout," and as the travelers stopped short to take advice a big frog jumped with a plunk into the canal. One more step would have taken the young men into its muddy depths, where they would have certainly received a most unpleasant ducking, and possibly have lost their lives, as it would have been no easy matter to have climbed up the yielding clay walls of the waterway.—Philadelphia Ledger.

Frog Fish vs. Human Flesh.

An interesting operation of flesh grafting, which was one of the discoveries of M. Paul Bert, has been performed at the great gun works in Paris by a surgeon named Dubouquet-Laborde. A workman had his foot badly burned by molten iron, destroying the skin over a surface of about eight inches by four. The surgeon took four strips of flesh from the thigh of a young man and as many from four different frogs, transferring them to the wounded man's foot. By great care the wound healed in eleven days. The cicatrix obtained by the frog's skin was soft, elastic and inodorous; that from the human flesh was much harder, producing irritation at many points.

The result of the operation is of great importance, showing the superiority of frog skin and flesh for serious wounds where both skin and flesh have been torn or burned away.—St. Louis Republic.

Women in Austria.

A census of Austria-Hungary takes place this year, and the minister of public instruction has announced that girls and women, if they can prove themselves competent, may apply for the place of enumerators. The emancipation of women in Austria is well advanced. One-third of all the post and telegraph clerks and all the telephone clerks, as well as the teachers in girls' schools, are women. Late last year, a list, Frau Dr. Kerschbaumer, of Salzburg, was allowed to open a hospital for her own. School teachers are well paid, their salaries ranging from \$70 to \$100. A large proportion come from noble families and those of officers and government officials. The position of government, on the contrary, is much disliked.—London News.

The Oldest Authorities.

Mrs. Elizabeth Oakes Smith, now living in Hollywood, N. C., is 84 years old and still vigorous in mind and body. Forty years ago she was a strong advocate of woman's rights. She contributed articles to the magazines and delivered lectures in all the large cities. Her "Woman and Her Needs," published in 1850, was reprinted all over the world. She was a Miss Prince, born in Maine, and married at the age of 16. Her husband died in 1850, and ever since she has lived in the south. She is probably the oldest living authoress in the United States. Sketches and poems from her pen are often seen in New York weeklies, but she left the lecture field about the time Anna Dickinson entered it.—

IN TIPPECANOE'S MEMORY.

A Statue to Be Erected—His Tomb to Be Marked Appropriately.

(Special Correspondence.)

CINCINNATI, Aug. 18.—There will soon be erected in the west some of the most notable monuments to the memory of Gen. and ex-President William Henry Harrison. The aggregate cost of three of them—one in this city, one at North Bend, O., and the other on Tippecanoe battle ground, Indiana—will be \$100,000. Several years ago the Harrison Memorial Association

of Cincinnati was organized, its object being to erect in this city an appropriate memorial to the hero of Tippecanoe.

Though born in Virginia Gen. Harrison's life work was in the western country, within a circle of which he made Cincinnati and vicinity the center. He was for some time in military command at Fort Washington (now Cincinnati), and later lived in rural simplicity on a farm about fifteen miles down the Ohio river, at North Bend.

He represented Ohio in congress, went from Ohio on the Colombian mission, and was a resident of Ohio when elected to congress and the presidency. For these reasons the people of Cincinnati have organized to do him honor by the erection of a token of grateful memory—an equestrian statue. The movement received stimulus with the election of the grandson of the Tippecanoe hero to the presidency in 1888, and the requisite \$50,000 for the statue and pedestal was secured some time ago. This statue is to be 14 ft. 6 in. in height, and is now approaching completion in the studio of the sculptor who designed the colossal equestrian statue of Grant for the city of Chicago. It represents the general in the military accoutrements of that period, and the face is considered by those yet living who remember and were acquainted with him a striking likeness.

The success of the Cincinnati movement caused those interested in the marking and preservation of historical places about the city to inaugurate a movement for a monument to the general on the site of his tomb at North Bend, and congress has quite recently given favorable consideration. In both senate and house committees to the bill to appropriate \$25,000 for a monument there.

The tomb is situated on a high knoll commanding a view of the Ohio river the full extent of the magnificent curve that gives the name to the place. Tradition has it that the general came daily to this point to watch the progress of the work of construction on the old Whitewater canal that tunneled a hill on his farm. Here he contemplated the initiative of a civilization that quickly revolutionized the whole country, and here he mourned the loss of a republic half a century in the tomb built for their reception. It is a vault about twenty feet square and fifteen feet deep, and is entered by several steps leading to a door shown in the accompanying picture.

The vault is of brick, plastered, and the elements have wrought rapid decay. Several times it has been necessary to repair it, and now it is proposed to rebuild the tomb of substantial material and raise above this foundation a lofty shaft that may be seen by all tourists by the river or the two railroads that, after running par-

allel along the river the whole distance from Cincinnati, here separate, one to the north and the other to the south of the tomb. The knoll, embracing several acres, the Harrison heirs will donate. Many tourists visit this place every year, not less to see the tomb than to enjoy the magnificent and beauty of nature here unfolded, and the picture shows plainly the well worn path that leads from the road up the slope to the tomb, from which one can look down upon the site of the old log cabin and the remains of the orchard, the source of the historic cider.

GEORGE S. McDOWELL.

AN ANECDOTE OF GREELY.

NEW YORK, Aug. 18.—His life through Horace Greeley was noted for a kind heart and a quick temper. He could not brook opposition, and injustice of any sort stirred his peculiar nature to its depths. That he was particularly tender of the welfare of the poor is shown by an anecdote for which Mr. J. W. Osgood, an inventor of New York city, is responsible. Says the latter:

All of thirty years ago, when a resident of Columbus, O., I designed and patented a machine for folding papers as they came from the press. Among other publishers to whom I showed my plans and from whom I secured orders was Horace Greeley. He commissioned me to build two machines for use in the Tribune press room, and on their erection and approval I was to receive \$5,000.

"Perhaps a month after I had got started at the task Mr. Greeley wrote me a letter countermanding his order and enclosing a check to indemnify me from loss. He explained that he had learned that the boys in the folding department of his paper were mostly the sons of poor widows, and he could not for an instant think of using any labor saving device that would deprive these worthy children of much needed work."

The Russian will not eat the flesh of the pigeon because the Holy Ghost descended in the form of a dove, whereby the genus Columba became symbolically identified with the mysticism of religion, and eating it would shock a reverential sentiment.

Capt. Shaw, chief of the London fire brigade, has published statistics of fires in theatres throughout the world in 1889. He says that fifteen theatres were destroyed, nineteen persons killed, ninety-one badly wounded, and goes on to prove by figures that by entering a theatre a person improves his chances of an untimely end.

A. T. Abernethy, professor of modern languages in Rutgers college, New Brunswick, is only 18 years old. He is probably the youngest teacher in the country to bear the title of professor.

OUR SPECIAL SALE

Of Summer Goods was so successful that we feel like thanking the public. However, we did not get quite through this week, we touch them again. Read closely.

Come to "ARCADE."

WE QUOTE—Pure Silk Pongee dress goods worth 48c for 21c. What say you?

WE QUOTE—Half Wool printed mohairs worth 25c for 13c. What say you?

Gloria silk umbrellas only 95c. We guarantee these not to cut; what say you?

WE QUOTE—Pure linen damask, full width, worth 100c per yard, for 60c; what say you?

WE QUOTE—10 pieces cream dotted Swiss worth 50c for 25c; now what say you?

100 pair ladies hose worth 35c for 25c; you must say, yes.

New chataine belt bags for ladies only. These are the latest New York fad. Come in and see them; what say you?

WE QUOTE—New Seri laces the proper thing to trim gingham and other wash dress fabrics, all made by hand; will you come and see them? What say you?

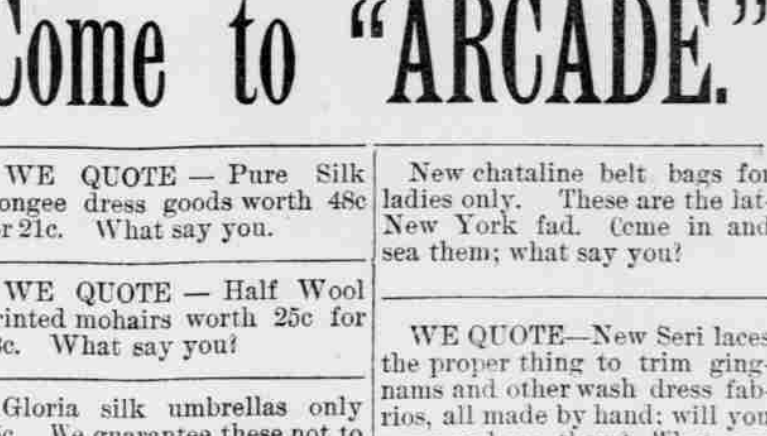

ADD LACE CURTAINS—50 pair odd lace curtains to be sold out cheap; what can you say?

REMNANTS EMBROIDERIES and Laces—We have about 100 remnants of these goods to be sold for what they will bring; what say you to this?

Winding up our Summer Ball of Yarn.

ARCADE!

W. J. WILSON, Manager. 139 N. Main.

PROPOSED STATUE.

tion of Cincinnati was organized, its object being to erect in this city an appropriate memorial to the hero of Tippecanoe.

Though born in Virginia Gen. Harrison's life work was in the western country, within a circle of which he made Cincinnati and vicinity the center. He was for some time in military command at Fort Washington (now Cincinnati), and later lived in rural simplicity on a farm about fifteen miles down the Ohio river, at North Bend.

He represented Ohio in congress, went from Ohio on the Colombian mission, and was a resident of Ohio when elected to congress and the presidency. For these reasons the people of Cincinnati have organized to do him honor by the erection of a token of grateful memory—an equestrian statue. The movement received stimulus with the election of the grandson of the Tippecanoe hero to the presidency in 1888, and the requisite \$50,000 for the statue and pedestal was secured some time ago. This statue is to be 14 ft. 6 in. in height, and is now approaching completion in the studio of the sculptor who designed the colossal equestrian statue of Grant for the city of Chicago. It represents the general in the military accoutrements of that period, and the face is considered by those yet living who remember and were acquainted with him a striking likeness.

The success of the Cincinnati movement caused those interested in the marking and preservation of historical places about the city to inaugurate a movement for a monument to the general on the site of his tomb at North Bend, and congress has quite recently given favorable consideration. In both senate and house committees to the bill to appropriate \$25,000 for a monument there.

The tomb is situated on a high knoll commanding a view of the Ohio river the full extent of the magnificent curve that gives the name to the place. Tradition has it that the general came daily to this point to watch the progress of the work of construction on the old Whitewater canal that tunneled a hill on his farm. Here he contemplated the initiative of a civilization that quickly revolutionized the whole country, and here he mourned the loss of a republic half a century in the tomb built for their reception. It is a vault about twenty feet square and fifteen feet deep, and is entered by several steps leading to a door shown in the accompanying picture.

The vault is of brick, plastered, and the elements have wrought rapid decay. Several times it has been necessary to repair it, and now it is proposed to rebuild the tomb of substantial material and raise above this foundation a lofty shaft that may be seen by all tourists by the river or the two railroads that, after running par-

allel along the river the whole distance from Cincinnati, here separate, one to the north and the other to the south of the tomb. The knoll, embracing several acres, the Harrison heirs will donate. Many tourists visit this place every year, not less to see the tomb than to enjoy the magnificent and beauty of nature here unfolded, and the picture shows plainly the well worn path that leads from the road up the slope to the tomb, from which one can look down upon the site of the old log cabin and the remains of the orchard, the source of the historic cider.

GEORGE S. McDOWELL.

Black—What a distinguished looking man that is, White!

White—Yes, through his direct insincerity many numbers of his fellow beings have been raised to a higher level.

Black—You don't say. A preacher, I suppose?

White—Oh, no! He runs the elevator in the Produce Exchange tower—Munsey's Weekly.

Breach of Hygienic Laws.

Howd—You look all broke up, Cholly.

By Jove, what ails you, dumb boy?

Cholly—Tewie accident, Howd. After doing my toilet last night forgot to put on my finger wing again, and so caught a tremendous cold.—Jewelry Circular.

A Horse Under Another Name.

"Hello, Mudd!" cried a countryman, saluting a fellow neighbor.

"Hush! Don't speak so loud," said the other. "Since coming to town I have changed my name to Myer, in deference to my wife's feelings."—New York World.

A Burglar Alarm.

The vault is of brick, plastered, and the elements have wrought rapid decay. Several times it has been necessary to repair it, and now it is proposed to rebuild the tomb of substantial material and raise above this foundation a lofty shaft that may be seen by all tourists by the river or the two railroads that, after running par-

allel along the river the whole distance from Cincinnati, here separate, one to the north and the other to the south of the tomb. The knoll, embracing several acres, the Harrison heirs will donate. Many tourists visit this place every year, not less to see the tomb than to enjoy the magnificent and beauty of nature here unfolded, and the picture shows plainly the well worn path that leads from the road up the slope to the tomb, from which one can look down upon the site of the old log cabin and the remains of the orchard, the source of the historic cider.

GEORGE S. McDOWELL.

A Critical View.

Wife (showing her summer bonnet)—What a symphony of colors!

Musical Husband—Hardly a symphony, my love. It's too loud for that.—Lippincott's.

What Possessed Nellie to marry such a fearful looking bear as that? He would scare an Indian.

Maud—It was his looks that decided her. She has always been so afraid of burglars.—Munsey's Weekly.
